Figure 1A and 1B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 13-15, 24 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Odaki '371.

Odaki shows in figure 4 a substrate 22 having oblique angle sidewalls and a conformal layer of phosphor 23. Claim 1 is anticipated. Claim 2 is rejected as the angle may be described as obtuse. Claim 3 is rejected as "about" does not structurally distinguish over Odaki. Likewise claims 4 and 5 are rejected as the angle in Odaki is "oblique". Claim 6 is rejected as the sidewall of Odaki is planar. Claim 13 is rejected as "about" does not structurally distinguish over Odaki. Claim 14 is rejected as there is phosphor along the entire sidewall in Odaki. Claim 15 is likewise rejected. Claims 24 and 25 are rejected as Odaki shows a phosphor conformally coated over sidewalls and a face of a substrate 22.

Claims 7-12 and 16-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

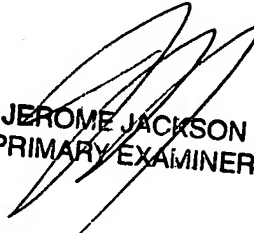

Claims 20-23 are allowable over the applied art of record.
